## PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student with strong proficiency in Java, Spring Boot, React, PostgreSQL, SQL, and Data Structures & Algorithms. Experienced in designing and developing full-stack web applications, RESTful APIs, and scalable database-driven solutions through internships and academic projects. Skilled in Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks, with strong analytical and problem-solving abilities. Passionate about building efficient, scalable, and maintainable software while continuously learning modern technologies to deliver high-quality solutions.

## TECHNICAL SKILLS

**Languages:** Java, C++, Python, SQL, JavaScript, HTML, CSS  
**Frameworks:** Spring Boot, React, Hibernate  
**Databases:** PostgreSQL, MySQL, MongoDB  
**Developer Tools:** Git, GitHub, Maven, Postman, VS Code  
**Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, REST APIs, DBMS, Operating Systems, Computer Networks

## EXPERIENCE

**Web Development Intern**, Crescent Info Tech Aug 2024

- Developed responsive web applications using HTML, SQL, and MongoDB.
- Optimized backend workflows and database connection pooling to improve performance.
- Designed efficient database queries for faster data retrieval in high-traffic endpoints.

**UI/UX Design Intern**, Crescent Info Tech May 2025 – Jun 2025

- Designed responsive wireframes and functional user interfaces following UI/UX principles.
- Conducted usability testing to identify friction points and improve user engagement.
- Collaborated with developers to ensure seamless translation of design systems into code.

## PROJECTS

**Attendance Management System** | Java, Spring Boot, React, PostgreSQL GitHub

- Built secure, role-based (RBAC) full-stack platform; reduced unauthorized access vulnerabilities for 500+ daily active users.
- Optimized PostgreSQL data retrieval time by 30% by implementing composite indexing on attendance logs via Hibernate/JPA.
- Architected asynchronous RESTful endpoints to ensure system throughput during concurrent request bursts.

**Medifind – Medicine Availability Finder** | Spring Boot, React, PostgreSQL GitHub

- Developed location-aware service; optimized proximity-based search latency by 25% using geospatial query optimization.
- Engineered ACID-compliant inventory transactions using Hibernate/JPA, ensuring 100% data integrity during multi-vendor stock updates.
- Optimized API throughput by implementing server-side pagination and response compression, reducing payload size by 35%.

## EDUCATION

**Karpagam Institute of Technology**, B.E. Computer Science and Engineering 2023 – 2027  
CGPA: 7.9/10

## CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals | AWS Academy Graduate – Cloud Foundations
- IBM Enterprise Design Thinking Practitioner | Celonis Foundations Certificate
